

PRO

The patent-pending PRO Reel is the most versatile, operator conscious hose reel on the market.

FEATURES

- Most hose reel work area coverage on the market.
- In-cab camera manhole placement system reduces setup time by 50%.
- Weight reduction of 500-lbs. off of the front of the truck.
- Increased operator ergonomics and ease-of-use at the controls with various rotational positions, vertical adjustment, and arm rest.

PRO

Vac-Con is proud to introduce the first of its kind, patent-pending, industry altering PRO Reel. It's time to step up your game and go PRO!

WHY PRO REEL

16-ft. of traversing hose reel across the front of the unit increases work area to 69.6 sq ft.

Display features Allison engagement panel and footage counter.

Reel rotates 180-degrees and boasts up to a 850-ft. x 1-in. hose capacity.

Control panel features arm rest at joysticks, unlimited locking positions, 4 rotational positions, and an 8-in. vertical adjustment.

Camera system with full driver visibility of hose reel location with a 180-degree field of vision.

Bolt-on connection to chassis eliminates welding to the truck and the outrigger leg, resulting in a weight reduction of 500-lbs.

Reduces job setup time by 50%.
