- Dual cyclonic separators protect the vacuum blower system from high-speed, drier debris
- Cold-weather ready
 - Polyethylene water tanks
 - Optional boiler system
 - Heated boxes for all-weather system maintenance / operation

CXT

The hydro-excavator designed by contractors for powerful, effective safe-digging operations no matter how tough the job

WHY X-CAVATOR CXT

Operator flexibility with a centrally-located control station and wireless operation.

PD Blower or 3-stage fan.

Single engine hydrostatic blower drive.

8-in. vacuum intake hose.

Cross-linked polyethylene water tanks available in 800, 1,100, or 1,300-gallon capacities with a 10-year warranty.

20 GPM @ 4,000 PSI water pump.

100-ft. retractable high-pressure hose reel and digging wand.

Hydraulically-driven scissor lift debris tank with a minimum 50-degree dump while maintaining an overall height under 12-ft.

Vacuum-driven by transfer case, eliminating the front driveline.
